ABOUT ME

I am a passionate and motivated Computer Science graduate (B.Sc, 2024) with a strong interest in software development and a desire to build solutions that make life easier through technology. I have hands-on experience in Python, React.js, javascript, SQL, HTML and CSS object-oriented programming, and database management systems.

I'm now actively looking for an opportunity where I can contribute to a tech-driven team, continue to grow as a developer, and learn from experienced professionals.

I believe in consistency, continuous improvement, and teamwork. I am always eager to learn new technologies, take on challenges, and deliver quality results. If given the chance, I'm confident that I can become a valuable part of any software development team.

EDUCATION

B.SC in Computer Science, G.N.D.U., Pathankot	2021 - 2024
